

All nine models of our replacement STOP switches have red buttons with "Pull to STOP, Push to Run" molded in white. Electrical configuration is 2 NC contacts with 1 NO auxiliary contact. They replace Armor part no. 10411-01. ARW471A7 has aluminum button, others plastic.

Choose the halo style you need from the listing at right. See photos above to confirm your selection. Replacement halos are available separately on page 135.

KEYED STOP SWITCH

ASME A17.1, 210.2(v), 1990 requires keyed STOP switches in new passenger elevators where STOP switches are specified. Conventional push/pull STOP switches give vandals a chance to leave elevators stranded, criminals time to stop between floors to rob tenants, and passengers the ability to interrupt elevator operation unintentionally by just leaning against the panel. Our keyed switch eliminates these opportunities. Keyed to AE102.

ARW471K1 for a round-halo switch. ARW471K2 for a square-halo switch.

CONTACT BASES, CAM, LAMP		
Adams part no.	Component no.*	Description
ARW450D1	7	Switch base with bulb socket, no contacts; replaces Armor part no. B-37038
ARW450D2	8	One-piece contact cam actuator; replaces Armor part no. B-37039A, B-37039B, 10419-01
ARW450D3	7	Switch base ass'y. with 2 NO contacts, illuminated
ARW450D4	7	Switch base ass'y. with 2 NO contacts, no lamp socket
ARW450D5	7	Switch base ass'y. with 2 NC contacts, no lamp socket
ARW450D6	7	Switch base ass'y. with 1NO/1NC contacts, illuminated
ARW450C1	5	Movable stainless steel contact arm with silver contact; replaces Armor part nos. A-36865B, 11864-01
ARW450C2	6	Brass stationary contact stud with silver contact; replaces Armor part nos. A-18526, 12061-01
A480L15*	12	Miniature bayonet lamp, 120V; NOTE: Sold only in packages of 10. Replaces Armor part no. 10947-01

* See page 132 for drawing with components.
