

Adams Replacement Heavy-Duty 02300-Series Line Starter Switches

O2301CV1

O2300CV1

O2304CV1

Adams stocks DC magnet switches to replace the popular Otis E6830A, B & D models listed below. All switches are pre-fitted with coils.

To order, identify the Adams part no. on the cross-reference chart below. (You will find corresponding Otis part nos. in your Otis Service Manual and on the back of the Otis switch being replaced.) The chart also shows type and number of main contacts, auxiliary contacts, and whether the switch uses arc barriers or deflectors.

| E6830A, B & D RELAYS | | | | | | | | |
|---------------------------------|---------------|----------------|---------------|---------------|---------|-------------------------------|-----------|-------------|
| Adams part no. | Otis part no. | Adams coil no. | Description† | Main contacts | | Make/Break auxiliary contacts | Arc defl. | Arc barrier |
| | | | | Stationary | Movable | | | |
