

# Three types of polyurethane guide rollers to choose from

- **SPx<sup>80</sup>**™ Quiet Soft Poly gives you the quiet ride of rubber, *PLUS*:
  - Tougher resistance to chemicals & ozone
  - Longer life
- **HDx<sup>95</sup>**™ Heavy-Duty poly outlasts conventional guide rollers where noise reduction is not a major concern
- **LFx<sup>70</sup>**™ Low-Friction, super-hard poly

O401

- Adams guide rollers address rigid elevator operating requirements
- Get the quality ride you demand
- Minimize roller-related call-back's...add perceived value to your service
- Adams Durabond® polyurethane is the industry's toughest
- Precision-machined and balanced hubs promote wobble-free ride
- Every batch is tested for proper composition
- Temperatures are recorded at all steps in the manufacturing process
- Machined rollers have 100% inspection of bore
- Concentricity and final dimensions are held tightly
- Final durometer is checked in each batch

### COLOR KEY FOR ADAMS POLY

Red = LF<sup>x80</sup> Low Friction  
 Black = SP<sup>x80</sup> Soft  
 Clear = HD<sup>x95</sup> Heavy Duty
