C021	1600	150	2 1/2"	n/a		226W1
C022	1600	150	2 1/2"	C025*		226W2

*Adams part no. C025 resistor replaces Otis part no. 232AE1 and is available separately at right.

RESISTOR TUBE

C025 resistor (250W/10W) is used with capacitors C013, C014 and C022; replaces Otis part no. 232AE1.
O21P2 terminal stud for C025 resistor.

A103C1 SOLID-STATE TIMER
No more changing out bad capacitors! This solid state, 20-120V DC only timer is for:

- Delay on BREAK
- Delay after DE-ENERGIZE
- OFF delay
- Delayed DROP OUT

Dip switches on back can be set from 0.1 to 102.3 seconds.
