

Water/Temp Resistant Grease is characterized by exceptional mechanical stability, very high load-carrying ability, excellent resistance to water, oxidation and corrosion, with excellent performance in high-low temperature environments.

Our premium-quality grease features excellent pumpability and dispensing properties, and is therefore suitable for low-temperature application. *Contains no molybdenum sulfide.*

APA100CC Aerosol WTRG. 16-oz. cans, 6 cans/case only.

Silicone Spray is a clear lubricant suitable for use on all sliding and rubber surfaces. Recommended for doors, windows, rubber seals, moving cables, weather stripping, gears & sprockets.

Adams Silicone Spray eliminates squeaks, keeps rubber seals pliable, and promotes smooth movement of most rubber, plastic, and metal parts. It is non-staining and has excellent electrical resistance.

APA140CC Silicone Spray. 12-oz. cans, 6 cans/case only.

Solvent/Component Contact Cleaner is a strong degreaser formulated for general-purpose parts cleaning. Use on all metal surfaces and on oil-resistant rubber and plastic. Brush away loose oil and grease...spray Solvent onto parts to be cleaned...and wipe clean with rag or towel.

APA130CC Aerosol Solvent Parts Cleaner. 12-oz. cans, 6 cans/case only.

Chain & Cable Lubricant is a petroleum-base product compounded with graphite and additives to give the best possible lubrication to lift cables, pulleys, and chains. The lubricant penetrates dirt to saturate chain links and cable surfaces for maximum wear resistance and rust protection.

Graphite lubricates and prevents wear between wire rope strands long after the oil has been dispersed. Chain & Cable Lubricant also contains a rust preventative to protect against exposure to moisture. This product can increase wire rope life up to 300%.

APA180CC Chain & Cable Lubricant. 12-oz. cans, 6 cans/case only.

Guide Rail Lubricant applies a low-friction *dry lubricating film* that protects rails for extended periods against rust and corrosion. Sprayed rails do not require degreasing, a real time and labor saver. Also recommended for parts that need to be stored indefinitely, shipped overseas, or that may come into contact with salt or saltwater spray.

APA31CC Guide Rail Lubricant. 16-oz. cans, 6 cans/case only.

Heavy-Duty Penetrating Oil is a powerful penetrating catalyst that breaks through rusted joints and pipe threads with "capillary wet drilling action." It penetrates rusty, sticky, gummy, and frozen joints regardless of temperature. It displaces moisture, and even starts engines!

HD is a dissolving cleaner that lubricates while it works. It virtually pulls itself uphill, around, and into tight cavities and bearing surfaces. Use on industrial equipment to stop corrosion...on relays and other electrical equipment...business machines...elevator buffers...U-bolts, and more.

Pinpoint sprayer eliminates messy waste; works upside down and in all directions.

APA150CC Heavy-Duty Penetrating Oil. 16-oz. cans, 6 cans/case only.

Light Penetrating Oil is an excellent general-purpose lubricant for use in the shop and at the job site. Can also be used as a short-term rust inhibitor. Contains no graphite, molybdenum disulfide, etc.

APA160CC Light Penetrating Oil. 16-oz. cans, 6 cans/case only.
