

LOCK WITH CAM

Lock with cam is used to latch service cabinets and for other locking applications inside the COP.

Cam dimensions are $1\frac{5}{8}$ " L x $\frac{3}{4}$ " W.

Illinois Lock key number is F359.

Order Adams part no. W468S1. Replaces Westinghouse part no. 569A925G01.

See more service cabinet locks in the Adams Fixtures section of this catalog. Key Part # F359

Lexan—Reg. TM General Electric Company
Survivor—Reg. TM Adams Elevator Equipment Company

SURVIVOR® REPLACEMENTS FOR WESTINGHOUSE HALL STATIONS

Two replacements for Westinghouse Type "A" hall stations include all the parts you need in one convenient unit. Includes two (2) 8-32x1" oval-head Phillips mounting screws.

Now you no longer need to buy and replace Westinghouse plastic back-up plates. Our complete replacement assemblies give you Survivor reliability in a fully-compatible unit.

An added advantage of having our Survivor pushbutton assemblies in your hall stations is that they accept our LED lamps. LED's last far longer than incandescents ...and even longer than neon.

Adams part no. W457A1. Replacement terminal hall station, stainless; complete with one Survivor pushbutton switch assembly.

Adams part no. W457A2. Replacement intermediate hall station, stainless; complete with two Survivor pushbutton switches.

Complete hall station replacements feature Survivor® pushbuttons

"HIGH-HAT" BUTTONS

These $\frac{5}{8}$ "-tall buttons ($1\frac{1}{8}$ " dia.) are found in many older Westinghouse elevators. Replace Westinghouse part nos. 5207D59G01 and 381D038H01.

W466W-char. for white button with Gorton-style character.

W465W-char. for white button with Helvetica-style character.

NOTE: If you use a W470K1 STOP switch in a Type E installation with toggle, you may need to grind into the retaining bolts to secure a proper fit.

WESTINGHOUSE TYPE "E" KEYED STOP SWITCH ASME A17.1, 210.2(v), 1990 requires keyed stop switches in new passenger elevators where STOP switches are specified. Our Westinghouse complete keyed switch meets this requirement with great attention to detail.

Great for replacements as well: Conventional push/pull STOP switches give vandals a chance to leave elevators stranded, criminals time to stop between floors to rob tenants, and passengers the ability to interrupt elevator operation unintentionally by leaning against the panel.

Order Adams part number W470K1.
